Modular Approval Request

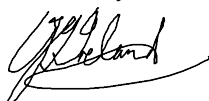

FCC ID: LV3RF28

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	YES. RF shield soldered over SMT active components	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	YES. All inputs are buffered digital input lines	
(c) The module must contain power supply regulation on the module	YES. Included 1% local LDO regulator	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	YES. Antennas are internal SMT and permanent. No additional power amplification.	
(e) The module must demonstrate compliance in a stand-alone configuration	YES, driven externally to a UR93 Host	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	YES. Module FCC ID permanently affixed to SMT side of module, visible near antennas	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	YES. In User manual	
(h) The module must comply with RF exposure requirements	YES	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,
