Re: Class II Permissive Change Request for FCC ID: LYHMPCI1V2

Dear CCS,

We hereby submit this application for Class II Permissive change under the provisions of FCC Part 2.1043.

The reason for the change request is that the module has been used in a new and different host as described in the application documents.

The module itself, frequency range, output power and antennas used have not changed and the new configuration continues to comply with FCC rules.

Please contact us if you have any additional questions.
