Re: Certification for Continental Automotive M3NA2C766336
IC: 7812A-A2C766336

If necessary, we have enclosed application materials for certification of Continental Automotive M3NA2C766336. It has been fully tested and found to comply with ISED RSS-GENv4.

Current Variants:

There are two principle variants of the EUT, PEPS1 and PEPS2. The PEPS1 variant employs a pair of door-handle mounted antenna coils (PN: GN15-15603) and three (3) vehicle chassis mounted antenna coils (PN: DS7T-15603). The PEPS2 variant employs only five (5) of the same vehicle chassis mounted antenna coils (PN: DS7T-15603). The tuning employed for the door-handle antennas is different than that of the chassis mounted antennas, which is the only difference between the PEPS1 and PEPS2 variants. The PEPS1 variant was fully tested and emissions from the PEPS2 variant were confirmed to be the same as those measured from the PEPS1.

If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely,

Joseph D. Brunett
