RE: FCC ID: M4Y-0005850_ATCB005304

Attention: Brian J. Dettling

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the UNII bands do not extend from 5150 to 5825MHz in a continuous band. Please correct the 731 form to show the actual frequency bands associated with the device.
2. Please provide a cover letter stating the purpose of the permissive change.
3. Please note that while the device may be powered via "Power Over Ethernet (POE)" this in itself does not alleviate the necessity for conducted emissions. Please remember that a long standing interpretation of the FCC is that if a part 15 device derives its power directly from an ac source or from a source which is eventually connected to an ac source, then conducted power would be required. Please explain and please properly justify why conducted emissions was not performed. One such justification may be that since this is supposedly only a PC to add antennae, no conducted emissions is needed.
4. FYI- please note that this device was originally granted in 2002 when DFS was not required for the 5250-5350MHz range. Please note that no PC appears to have been done to justify the device use in DFS bands or to remove the 5250-5350MHz bands. Please note that if this device still operates in the 5250-5350MHz band and has not properly been tested to comply with the DFS rules, the device may be illegal. Please address this situation.
5. Please note that in line with the fyi above, it may not be possible for a TCB to issue a PC2 on this device until the DFS bands have been properly addressed. A question to the FCC has been sent in this regards.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
