

Description of Operation

The EUT is a 802.11b/g Wireless mini-PCI Module with 11 channels. And this device provided of transmitting speed 11, 5.5, 2, 1 Mbps and 54, 48, 36, 24, 18, 12, 11, 9, 6, 5.5, 2, 1 Mbps, the device of RF carrier is CCK, DQPSK, DBPSK and 64QAM, 16QAM, QPSK, BPSK.

The device adapts direct sequence spread spectrum and orthogonal frequency division multiples modulation. And the antenna was PIFA Antenna provided diversity function to improve the receiving function. It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires.

And this EUT Operation in 2.4GHz Direct Sequence Spread Spectrum (D.S.S.S) or Orthogonal Frequency division Multiplex (O.F.D.M) radio transmission.

In addition, its standard compliance ensures that it can communicate with any 802.11b/g network.

The other instruction, please have a look at the user's manual.
