

Description of Operation

EUT is a [IEEE 802.11 g/b Mini-PCI Module](#) with 11 channels. This device provided four kind of transmitting speed 1,2,5.5 and 11Mbps. The device of RF carrier is DQPSK,DB PSK and CCK.

The device adapts direct sequence spread spectrum modulation. The Connector antenna was scolded on PCB provided diversity function to improve the receiving function.

This [IEEE 802.11 g/b Mini-PCI Module](#) is an IEEE 802.11b Wireless LAN adapter.

It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires. [Operation in 2.4GHz](#)

[Orthogonal Frequency Division Multiplex \(O.F.D.M\) or Direct Sequence Spread Spectrum \(D.S.S.S\)](#) radio transmission, the [IEEE 802.11 g/b Mini-PCI Module](#)

transfers data at speeds up to 64/128-bit Wired Equivalent Protection(WEP) algorithm is used. In addition, its standard compliance ensures that it can communicate with any [802.11g/b](#) network.
