

TRANSMITTER OPERATION

FAN /OFF: to turn on and turn off the fan

FOR/REV: to set the rotating direction of the fan

FAN SPEED: to set the fan speed

MODE: to set the rhythm mode, sleep mode and light delay mode

rhythm mode: the fan speed is rhythm.

sleep mode: automatic reduction of the fan speed for every half hour and finally keep the lowest level

light delay: the lighting brightness is maximum and keep 3 minutes when light delay function is on.

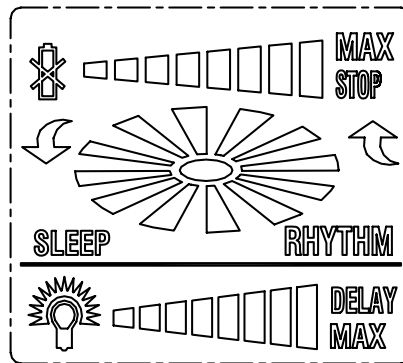

LIGHT DIMMER:

light on/off: toggle light key and to set the light on/off.

dimmer: press and hold the light key and to set the lighting brightness.

PRESET FUNCTION (MEMORY):

If you use the wall switch to turn off the fan, the speed and lighting level that you previously set will remain in the remote control's memory. The next time electricity is turned on, fan operation will resume at the same speed and lighting level when you press the FAN or LIGHT on the remote unit.
