RE : FCC ID: MC6TDC8020

The above referenced item complies with 47 CFR 22.919 as follows :

The Electronic Serial Number (ESN) for each transceiver is unique.

The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit's operating software is not alterable. The ESN is isolated from fraudulent contact and tampering. (Choose one of the following)

The host component does not contain other information, it is not removable and its electrical connections are not acceptable.

The host component does contain other information, and the ESN information is encoded using
(Then choose one of the following three)

(1) Multiplication or division by a polynomial.

(2) Cycling coding.

(3) The spreading of ESN bits over various non-sequential memory locations.

The ESN is factory set and is not alterable, transferable, removable, or otherwise able to be manipulated. Cellular mobile equipment is designed such that any attempted to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.
