Gentlemen:

This document is in response to FCC Correspondence Reference Number 12090 & 12479. These FCC references concern emissions classification designators and MPE limits for FCC ID MCDFFPA8689-120, 731 Confirmation # EA96034. The following are the emissions classification designators for the MPD amplifier:

Type	Emission Designator
AMPS	F8W {conventional AMPS}
AMPS	F1D {wideband data of conventional AMPS}
TDMA	DXW
CDMA	F9W

MPE levels are not needed at the amplifier level for the MPE is considered after the amplifier gets integrated into the base station and the base station is certified. 2FSK modulation type is not needed for this amplifier at this time. MPD's request for Confidentiality letter is being submitted along with this document. According to Mr. Frank Coperich, this confidentiality request letter was missing.

Best Regards,

Patrick K. Madigan
Application & Project Engineer
