Re: FCC ID: MCL74487604: Request for Class III change to an SDR

To Whom It May Concern,

It is the intent of the Hon Hai Precision Corporation Ltd. to modify the operating frequencies of the MCL74487604 radio module through a firmware code change. This will activate the UNII band of 5250-5350 and 5470-5725MHz. The end user of the radio will be referred to a new software image, which will enable these added channels. There is no change to the hardware. The test report and associated documents with the necessary data is being included with this request.

Please contact me if you have any questions

Thank you.

Sincerely,

*Rio Chen*
