The image displays two electronic circuit boards. The top board is a green printed circuit board (PCB) populated with several integrated circuits (ICs). Notable components include two large black ICs labeled 'HX-COM HX8440M 9802' and 'HX-COM HX8440M 9807', and another labeled 'HX-COM HX915ADH 1140'. There are also smaller ICs labeled 'HX-COM HX915ADH 9840' and 'HX-COM HX915ADH 9840'. A small white component labeled 'AT89C51' is visible. The bottom board is a larger green PCB, densely packed with components. It features a large black IC labeled 'HX-COM HX8440M 9802' and another labeled 'HX-COM HX8440M 9807'. There are also several smaller ICs labeled 'HX-COM HX915ADH 1140' and 'HX-COM HX915ADH 9840'. A small white component labeled 'AT89C51' is visible. The boards are shown against a plain white background.
