Subject: Application review of the Portfolio MT#14796

Marianne, please forward to Phil Raymond (I do not have his contact information).

Thanks, Chris

Phil, I have completed the review of the application documents that have been submitted and have the following questions/requests:

1. Emission designator in the report is stated as 270K0GXW, which has too many characters. Maybe 2nd '0' is not needed. Please submit corrected Emission Designator.
2. Need Tune-up Procedure per 2.1033(c)(9)
3. Need Digital Modulation Description per 2.1033(c)(13)
4. Need DC voltages and Currents per 2.1033 (c)(8)
5. Need Parts list per 2.1033(c)
6. Need full schematics (did not provide RF portion) per 2.1033(c)(10)
7. The Pt. 22 RF test report for module appears to report only Conducted Power. Please provide the ERP for this EUT.
8. There was no RF test report for the 24-E (only RE Spurious). This documentation must be submitted for review.
9. Please provide the maximum number of GSM time slots (of the 8 available) used by the EUT.

Please submit this information to charvey@ieee.org and mbosley@metlabs.com.

Best regards,

Chris Harvey
