RE: AboCom Systems

FCC ID: MQ4ARM914

I have a few comments on this Application.

- 1.) Please provide an Operational Description for this product. This is an FCC requirement.
- 2.) In addition to the label, please indicate by use of either a line drawing or photograph where the label will be placed on the product.
- 3.) The Confidentiality Request letter does not mention the BOM listing. Do you wish to have the Parts List available for viewing on the FCC website? FYI: Parts Lists are not required for any low power transmitters under Part 15.
- 4.) FYI: The DoFC report for Unintentional emissions is not required to be filed by FCC.
- 5.) FYI: The radiated band edge tests need only be performed on the highest channel at 2483.5MHz, and on the lowest channel at 2400MHz.
- 6.) Please provide RF Exposure evaluation (MPE calculation) as a separate document.
- 7.) In the Internal Photographs, the FCC requires that all RF shielding be removed. Please review your photos.

Regards,

William H. Graff  
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
