Dear Andy:

1. The applicant has advised me that the B900ss-20 is only being certified by Adcon with the antenna that was submitted. Adcon is not offering any other antenna for certification.

The manual is merely providing general information about various antennas to potential OEM's who wish to use a different antenna and obtain their own separate certification.

2. I have uploaded an external photograph of the device with the shielding installed.

Should you have any questions or require any further information, please advise.

Regards,
