Re: response for FCC ID MRISI583

Subject: Response the request for additional information.

In your request question that we answering as below:

1. Response your item one of question, it is our mistook in typing report. We typed the report with template of MS word. It is mention 3 or 10 meters for FCC or CE test original. And we did the wrong description in this case. It is should be 3 meter for correct distance during test. Please refer the photo in test report.
2. The statement that the Robot was in mode 1 for testing, it is mean we only used one mode for test. And the mode is used self testing mode as operating manual mode 5 said. We hope do not make you confuse. Actually, I was wrong.
In our testing report, if we have performed the 5 preliminary test. It will mention mode 1 to 5, and choose one mode for final test. Then mention mode 3 or (1, 2, 4, 5). I hope its won't let you confuse any more.

Please kindly help to approve this case ASAP. Because its spend a long time for certificate. Thanks in advance.
