Mini Video Sender CV-958

Mini Video Sender CV-958 uses state-of-the-art 5.8 GHz technology to transmit crisp clear video and audio signals through the walls and between the rooms in a house. You can use this product CV-958 to send the audio/video signals from a security camera to a TV monitor in a remote location for wireless surveillance. You can also use this product to send the audio/video signals from a source such as satellite receiver, VCR, Camcorder, DVD player, etc to a TV in a different room. The audio signal is mono for the surveillance application.

Features:

- ✧ 5.8 GHz ISM Band for High Quality Video and Audio
- ✧ Compact and Mini Size
- ✧ Hidden Antenna and No Moving Parts for Better Reliability
- ✧ FM Video with Mono Audio

Applications:

- ✧ Home A/V Entertainment
- ✧ Baby Monitor
- ✧ Video Conference
- ✧ Security Surveillance
- ✧ Wireless Multimedia

Installation and Operation:

Connect the CV-958 transmitter and the source equipment (surveillance camera, satellite receiver, VCR, camcorder, DVD, etc.) by the following steps.

1. Plug A/V cables into the video and audio sockets of the source equipment and plug the other ends into RCA jacks of the transmitter. Be sure to match the colors for the video and audio jacks while making connection.
2. Plug one end of the AC/DC adapter into the DC IN jack of the transmitter and the other end into a nearby wall outlet,
3. Open the red rubber lid, under which a LED gleams, and choose the channel number by setting the DIP switch.

Connect CV-958 receiver and the TV by the following steps.

1. Plug one end of the AC/DC adapter into the DC IN jack of the receiver and the other end into a nearby wall outlet. Turn on the power and the red LED will light up.
2. Choose the same channel as the transmitter by pressing the channel selector.
3. Plug A/V cables into the video and audio sockets of TV and plug the other ends into RCA jacks of the transmitter. Be sure to match the colors for the video and audio jacks while making connection.

Notice: The changes or modifications not expressly approved by the party responsible for compliance could void the user's right to operate the equipment.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
