To playback your own recorded message by pressing the button below

NOTE: To change the recorded message, repeat above steps.

Store telephone number

To store telephone numbers as the following steps:

Press the button + 1 + **phone number** + to store the first telephone number,

Press the button + 2 + **phone number** + to store the second telephone number,

Press the button + 3 + **phone number** + to store the third telephone number.

NOTE: If you make a mistake just repeat the process above.

Operation

Press the round button on keyfob or on the main unit, the main unit will dial the 3 preset numbers automatically. It will call each number for 45 seconds. If the receiver does not answer the phone, it will keep dialing for 5 cycles and then turn to standby mode.

When the receiver answers the call from HA28 they will hear the pre-recorded message. After that, the receiver of the call can then open up a two-way communication and listen into the callers property by pressing any figure button on their telephone key-pad. After communicating for approximately 45 seconds, it will have 3 "Beep" tone to remind receiver to extend time to talk and listen. At this moment, receiver can press any figure button on the key-pad to extend another 60 seconds to talk and listen. When the conversation is over, main unit will be back to standby mode. If the call is answered, main unit will stop dialing for other telephones.

NOTE: As the mian unit is hands free it is possible to communicate with the caller to a maximum distance of 3 metres.

Battery precaution

- Remote battery: A23S battery
- Use only the appropriate size batteries.
- If unit is not used for a long period time, remove the batteries to prevent damage of possible battery leakage.
- When red LED of main unit is on, the back up battery is low. When press button on keyfob to get help, the LED will light on green, if light on red, the battery is low.
