Terms and Abbreviations

The following is a list of abbreviations and terms used throughout this document.

| Abbreviation/Term | Definition |
|-------------------|--|
| AGC | Automatic Gain Control |
| ALC | Automatic Level Control |
| AROMS | ADRF' Repeater Operation and Management System |
| BCU | Band Combiner Unit |
| BTS | Base Transceiver Station |
| CDMA | Code Division Multiple Access |
| CHC | Channel combiner |
| CW | Continuous Wave (un-modulated signal) |
| DAS | Distributed Antenna System |
| DL | Downlink |
| Downlink | The path covered from the Base Transceiver Station (BTS) to the subscribers' service area via the repeater |
| HE | Head End |
| HPA | High Power Amplifier |
| HW | Hardware |
| IF | Intermediate Frequency |
| LNA | Low Noise Amplifier |
| LTE | Long Term Evolution |
| MS | Mobile Station |
| NMS | Network Management System |
| ODU | Optical Donor Unit which is located in ADXV-HE. |
| OEU | Optic Expansion Unit |
| PLL | Phased Locked Loop |
| POI | Point Of Interface |
| PSU | Power Supply Unit |
| RF | Radio Frequency |
| ADXV-HPR | Remote Unit |
| RM | Remote Module |
| SW | Software |

| | |
|---------------|--|
| UL | Uplink |
| Uplink | The path covered from the subscribers' service area to the Base Transceiver Station (BTS) via the repeater |
| VSWR | Voltage Standing Wave Ratio |

1. INTRODUCTION

Currently the ADXV-HPR supports 600,700 MHz (Lower A, Lower B, Lower C, and Upper C), SMR800/Cellular, PCS, AWS, WCS, BRS FDD/TD-LTE(NR), N77L(3.45 GHz) bands.

1.1 Highlights

- Modular Structure (HE)
 - Supports multi bands service in one body
 - Supports up to 12 slot available for POI, ODU, CHC card, etc.
- Supports up to a maximum of 96 Remote Units(using Optical Expansion Unit)
- 43/45/46dBm of downlink composite output power
- Requires only single strand of fiber per remote unit
- Operates with up to 5dBo optical loss
- Supports SNMP v1, v2, v3 (get, set & traps)
- Web-based GUI Interface; No 3rd party GUI software required
- Web-GUI connectivity via DHCP in host mode

1.2.1 ADXV-HPR Quick View

Figure 1-1 ADXV-HPR Quick View (Front and Rear)

1.3 Warnings and Hazards

WARNING! ELECTRIC SHOCK

Opening the ADXV-HPR could result in electric shock and may cause severe injury.

WARNING! EXPOSURE TO RF

This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 100 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. RF exposure will be addressed at time of installation and the use of higher gain antennas require larger separation distances.

(Antenna gain considering the cable loss: -5.0dBi)

WARRANTY

Opening or tampering the ADXV-HPR will void all warranties.

Lithium Battery: CAUTION. RISK OF EXPLOSION IF BATTERY IS REPLACED BY INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO INSTADXV-HPRCTIONS.

Ethernet Instructions: This equipment is for indoor use only. All cabling should be limited to inside the building.

FCC Part 15.105 Class A

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their own expense.

FCC WARNING

WARNING. THIS is NOT a CONSUMER device. It is designed for installation by FCC LICENSEES and QUALIFIED INSTALLERS. You MUST have an FCC LICENSE or express consent of an FCC Licensee to operate this device. Unauthorized use may result in significant forfeiture penalties, including penalties in excess of \$100,000 for each continuing violation.

Laser Safety

Fiber optic ports of the ADXV-HPR emit invisible laser radiation at the 1310, 1550nm wavelength window.

To avoid eye injury never look directly into the optical ports, patch cords or optical cables. Do not stare into beam or view directly with optical instruments. Always assume optical output is on.

Only technicians familiar with fiber optic safety practices and procedures should perform optical fiber connections and disconnections of the ADXV-HPR and the associated cables.

The ADXV-HPR complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to laser notice No.50 (July26. 2001)@IEC 60825-1, Amendment2 (Jan. 2001).

Care of Fiber Optic Connectors

Do not remove the protective covers on the fiber optic connectors until a connection is ready to be made. Do not leave connectors uncovered when not connected.

The tip of the fiber optic connectors should not come into contact with any object or dust.

Refer to the cleaning procedure for information on the cleaning of the fiber tip.

Use of unauthorized antennas, cables, and/or coupling devices not conforming with ERP/EIRP and/or indoor-only restrictions is prohibited.

Home/ personal use are prohibited

Only 50 ohm rated antennas, cables and passive equipment shall be used with this remote. Any equipment attached to this device not meeting this standard may cause degradation and unwanted signals in the bi-directional system. All components connected to this device must operate in the frequency range of this device.

Only 50 ohm rated antennas, cables and passive components operating from 150 - 3 GHz shall be used with this device.

FCC Part 15.21 Statement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

CAUTION

Double Pole/Neutral Fusing.

Permanent earthing

for PERMANENTLY CONNECTED EQUIPMENT, a readily accessible disconnect device shall be incorporated external to the equipment;

WARNING: This is NOT a CONSUMER device. It is designed for installation by an installer approved by an ISED licensee. You MUST have an ISED LICENCE or the express consent of an ISED licensee to operate this device.

RF Radiation Exposure

RF Exposure Statement

The antenna(s) must be installed such that a minimum separation distance of at least 100 cm is maintained between the radiator (antenna) and all persons at all times. This device must not be co-located or operating in conjunction with any other antenna or transmitter.

*Note: The equipment is the coverage system for in-building services and it is installed in buildings with high ceilings. It covers general public institutions.

(• Shopping malls, • Campus areas • Airports)

(Antenna gain considering the cable loss: -5.0dBi)

La ou les antennes doivent être installées de telle sorte qu'une distance de séparation minimale d'au moins 100 cm soit maintenue entre le radiateur (antenne) et toutes les personnes en tout temps. Cet appareil ne doit pas être situé ou fonctionner conjointement avec une autre antenne ou un autre émetteur.

*Note: L'équipement est le système de couverture des services de construction et il est installé dans des bâtiments dont les plafonds sont élevés. Il couvre les institutions publiques en général.

(• Centres commerciaux, aires de campus, aéroports)

(Gain d'antenne compte tenu de la perte du câble : -5,0dBi)

2. BLOCK DIAGRAM

2.1 ADXV-HPR-46B Block Diagram

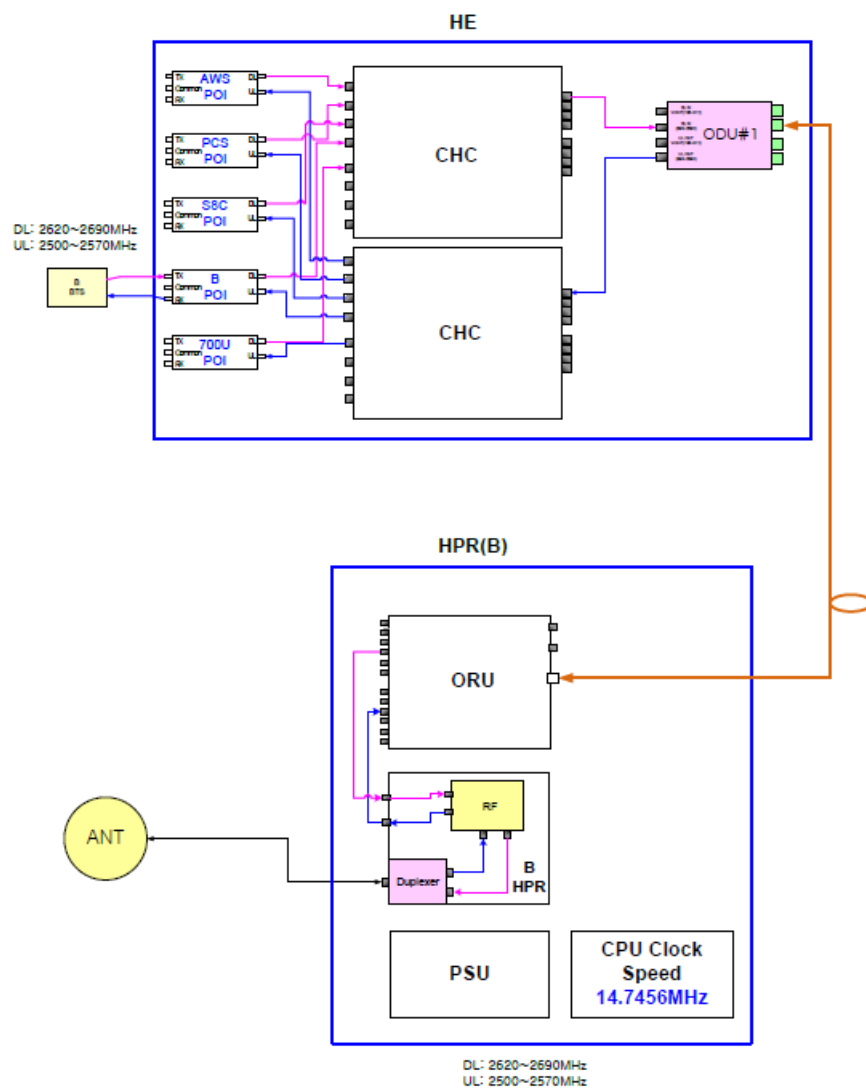

Figure 2-1 ADXV-HPR-46B Block Diagram

2.2 ADXV Scalability

Table 2-1 ADXV Scalability

| Unit | | Scalability | Remarks |
|----------------|-------------------|---|--|
| Supported band | | 600, 700F, S8C, AWS, PCS, WCS, BRS TD-LTE, 700FN, BRS FDD, N77L | |
| HE | POI | No limitation in 12 slots except NMS | |
| | NMS | 1 | |
| | CHC | No limitation in 12 slots except NMS | |
| | Optic Unit | No limitation in 12 slots except NMS In case of Aux, No limit in 8 Aux ports | |
| ADXV-HPR | ADXV-HPR | | 64 |
| | PSU (ADXV-HPR) | Adaptor type | 1 per HPRemote Module(HRM) |
| | | 19" rack mount (AC or DC) | 1 Capable of supplying power to 4 Remote Modules |

3. ADXV OVERVIEW

3.1 Head End

The head end unit must always be connected to the Base Station using a direct cabled connection. This system has not been approved for use with a wireless connection via server antenna to the base station.

- Specifications
 - Size: 19.0 x 19.7 x 7inches (482 x 500 x 178 mm)
 - Weight: 64.8lbs @5 POI, 2 CHC, ODU and NMS
 - Power Input: 110VAC(optional) or -48VDC

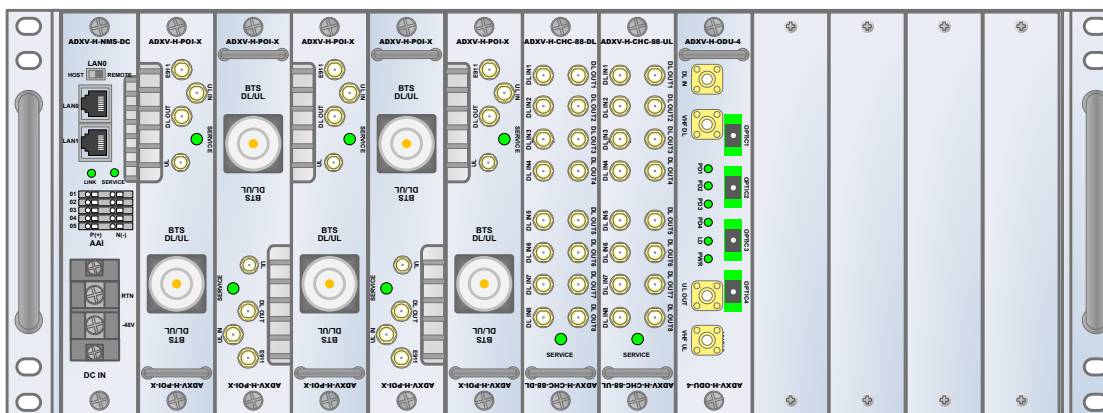

Figure 3-1 Head End Front View

3.1.1 NMS (Network Management System)

- Functions and features
 - Supports SNMP v1, v2, and v3 (get, set & trap) and web-based GUI Interface.
 - Monitors alarms and status
 - Provides control interfaces with all subordinate modules
 - Provides overall DAS structure via the auto tree update function
- Spec
 - Size: 19.0 x 12.1 x 1.7inches
 - Weight: 3.5lbs

Figure 3-2 ADXV-H-NMS Front View

3.1.1.1 LEDs

NMS has LEDs on the front panel as shown in Figure 3-3.

Figure 3-3 NMS LED

Table 3-1 NMS LED Specifications

| ADXV-HPR-NMS | | Specifications |
|--------------|-------------|--|
| POWER | Solid Green | NMS power is ON |
| | OFF | NMS power is OFF |
| LINK | Solid Red | HE Link Fail alarm exists in the system |
| | Solid Green | No HE Link Fail alarms are present in the system |

3.1.1.2 AAI

Figure 3-4 NMS AAI

NMS has 5 external alarms out interface pins on the front panel.

Table 3-2 NMS AAI Specifications

| AAI Alarm Status | Output |
|------------------|-----------------------|
| Normal | High Impedance (Open) |
| Alarm | Low Impedance (Short) |

3.1.1.3 Ethernet Port

The Ethernet port can be used to communicate directly with the ADXV-HPR using a RJ-45 crossover cable or can also be used to connect the ADXV-HPR to an external modem box.

Figure 3-5 Ethernet Port

3.1.1.4 Host/Remote Switch

The Host/Remote Switch allows the user to switch the default Repeater IP, Subnet Mask, and Gateway of the repeater to an alternative setup. These settings can be adjusted by logging into the ADXV-HPR in HOST mode and configuring the settings under the Modem Box Setting section under the Install Page of NMS.

Once the settings are set, flipping the switch to the REMOTE position will reboot NMS module with the new alternate settings. *Please note that when the NMS is set to the REMOTE position, DHCP is disabled and the NMS will not automatically assign an IP address to any device that connects directly to the NMS.*

Figure 3-6 Host/Remote Switch

- Host IP: 192.168.63.1 (Fixed IP, unable to modify this IP address)
- Remote IP: 192.168.63.5 (Default IP, but can be modified in Host mode)

3.1.1.5 Power Connection (for DC -48V)

NMS has terminal block for DC power connection on the front panel.

You should verify power polarity of each power line and should turn on the power after power connection necessarily.

3.1.1.6 Power Connection (for AC 110V)

NMS has Chogori connectors for AC power feeding and battery backup on the front panel.

You should verify power polarity of each power line and should turn on the power after power connection necessarily.

3.1.2 POI (ADXV-H-POI-XX)

Figure 3-7 POI front View

- Functions and features
 - Provide RF interface with BTS
 - Each POI has independent gain control and filtering
 - Modular type and hot swappable
 - Supports duplex port and simplex RX port
 - Easily support additional frequency bands by adding a single POI
 - Reduces complexity and overall equipment size
- Specifications
 - Size: 1.3 x 17.1 x 6.85inches
 - Weight: 6.2lbs

3.1.2.1 LED

POI has LEDs on the front panel as shown in Figure 3-8.

POWER

Figure 3-8 POI LED

Table 3-3 POI LED Specifications

| POI | | Specifications |
|-------|--------------|---|
| Power | Solid Green | POI power is ON and POI is normal status |
| | Solid Red | POI power is ON and POI is hard fail alarm status |
| | Solid Yellow | POI power is ON and POI is soft fail alarm status |

3.1.2.2 RF Ports

BTS DL/UL, DL OUT, UL IN, E911 Ports (refer to Figure 3-7) are located at the front of the POI

Table 3-4 POI RF port

| RF Port | Function |
|-----------|--|
| BTS DL/UL | BTS Interface, DL duplexer Input, UL duplexer output |
| DL OUT | DL output |
| UL IN | UL input |
| UL OUT | UL output not passing through duplexer |
| E911 | E911 RF interface |

3.1.3 Channel Combiner (CHC, ADXV-H-CHC)

Figure 3-9 ADXV-H-CHC Front View

- Functions & Features
 - Combines DL signals received from each POI and feeds the combined signals to the ADXV-H-ODU
 - Combines UL signals received from each ADXV-HPR and feeds the combined signal to the ADXV-H-POI
 - No limit of installation number and location to install POI, ODU, CHC card in 12 slots except NMS card
- Specifications
 - Size: 1.3 x 17.1 x 6.85inches
 - Weight: 4.4lbs per CHC

3.1.3.1 RF ports

3.1.3.1.1 RF ports at the front panel (DL 1 to DL 8, UL 1 to UL 8)

DL 1(to DL 8) & UL 1(to UL 8) RF ports are connected to DL OUT/UL IN Ports at the front panel of POI.

- Receive the downlink signal from each POI
- Split the uplink signal received from ODU to each POI

3.1.3.1.2 RF ports at the back panel (DL 1 to DL 8, UL 1 to UL 8)

DL 1(to DL 8) & UL 1(to UL 8) RF ports are connected to DL IN/UL OUT Ports at the back panel of ODU.

- Transfer the combined downlink signals to ODU
- Receive the uplink signal from ODU

3.1.4 Optical Donor Unit (ODU, ADXV-H-ODU-4)

Figure 3-10 ADXV-H-ODU-4 Front view

- Functions & Features

- Converts signal from RF to optic and transports signals up to a maximum of 10Km (optical 5dB loss including optical connection loss).
 - One ADXV-H-ODU-4 supports up to 4 ADXV-HPRs
 - Minimizes the number of optic fiber cable need by transporting multi band signals over a single strand of fiber using WDM technology.
- Spec
 - Size: 1.3 x 17.1 x 6.85inches
 - Weight: 5.3lbs

3.1.4.1 LEDs

The ADXV-H-ODU-4 has the following LEDs on the front panel as shown in Figure 3-11.

Figure 3-11 ADXV-H-ODU-4 LED

Table 3-5 ODU LED Specifications

| ADXV-HPR-Module | | Specifications |
|-----------------|--------------|--|
| PWR | Solid Green | Module power is ON |
| | OFF | Module power is OFF |
| LD | OFF | ODU is not installed |
| | Solid Yellow | LD Fail alarm exists in the ODU |
| | Solid Green | No LD Fail alarm is present in the ODU |
| PD1 to PD4 | Solid Yellow | PD Fail alarm exists |
| | Solid Green | No PD Fail alarm is present |

3.1.4.2 RF Ports

Figure 3-12 ODU RF Ports

3.1.4.2.1 DL IN/UL OUT

The combined downlink signal received from ADXV-H-CHC is transferred to the DL IN at the back of ODU. The UL OUT port connects any of the ports on back of the ADXV-H-CHC labeled UL 1 ~8.

3.1.4.2.2 VHF DL/VHF UL

VHF DL/UHF UL ports are used to support Public Safety in the VHF & UHF frequency bands. VHF/UHF signals for Public Safety bypass the ADXV-H-CHC and connect directly to the VHF DL/UHF UL ports of the ADXV-H-ODU.

3.1.4.3 Optic Ports

Figure 3-13 ODU Optic Ports

The ADXV-H-ODU4 has (4) optic ports and can support up to (4) Main ADXV-HPR's. Likewise, the ADXV-H-ODU1 has (1) optic ports and can support up to (1) Main ADXV-HPR.

3.2 ADXV-HPR

- A remote unit (single ADXV-HPR chassis base) is composed of an ADXV-HPR-ORU (Optical Remote Unit), a PSU (Power Supply Unit) and plural band's RM (Remote Module).
- Specifications
 - Size: 19.0 x 14.96 x 7 inches (482 x 380 x 178 mm)
 - Weight: 62.17lbs (28.2 Kg)@4 HPR(600/437F/43S8C/46P/46A/46B), ADXV-HPR-ORU and PSU
 - Power Input: 110VAC or -48VDC

Figure 3-14 ADXV-R Front and Rear View

3.2.1 Remote Module (ADXV-HPR-4XX)

Figure 3-15 ADXV-HPR-4XX (RM) Front and Rear View

- Spec
 - Size: 2.75 x 17.8 x 10.3 inches
 - Weight: 13.22lbs for 436, 437F, 43S8C, 46P, 46A, 45W, 46BT,46B

3.2.1.1 HPR ID numbering and RF line connection scheme

HPR ID right next to ADXV-HPR-ORU is HPR #1, HPR second next is HPR #2, the rest of HPR s' ID numbering is in the same order.

With RF connection between ADXV-HPR-ORU and HPR, it is necessary ADXV-HPR ID number should be equal to DL/UL port number of ADXV-HPR-ORU because of ADXV-HPR ID management and normal serial communication.

Figure 3-16 ADXV-HPR ID numbering and RF connection between ADXV-HPR-ORU and ADXV-HPR

3.2.1.2 RF port

DL IN/UL OUT connect to ADXV-HPR-ORU's DL port and UL port, it is necessary to connect UL's port number equal to DL's because of serial communication with ADXV-HPR-ORU.

CPL (-40dB): DL output 40dB coupling

SERVER: DL output, UL input, Server Duplexer port

3.2.1.3 Power port

DC IN: Port for power supply (+27VDC) and communication with Controller inside PSU.

3.2.1.4 LED

| LED color | Status |
|-----------|-----------|
| Green | Normal |
| Yellow | Soft fail |
| Red | Hard fail |

3.2.2 Optical Remote Unit (ADXV-HPR-ORU)

Figure 3-17 ADXV-HPR-ORU Front View

- Spec
 - Size: 2.36 x 13.8 x 10.3 inches
 - Weight: 11.02lbs

3.2.2.1 Front port

DL1-DL6: DL port connect to 'DL IN' of ADXV-HPR (Remote Module) (see 3.2.1.1)
 UL1-UL6: UL port connect to 'UL OUT' of ADXV-HPR (Remote Module)(see 3.2.1.1)
 E-DL/E-UL ports connect to external splitter for extension of band RM
 VHF-DL/VHF-UL ports connect to the ADXV VHF/UHF RM
 OPTIC port connects with optic line with waterproof optical connector (provided by ADRF)

3.2.2.2 Rear port

DC IN port connects to PSU's ADXV-HPR-ORU port.
 PSU ALARM port connects to PSU's ALARM port.
 GUI port for connection to Lap top.
 FAN port for connection to FAN unit.

3.2.2.3 LED

| LED | LED color | Status |
|---------|-----------|-------------|
| Link | Green | Link normal |
| | Yellow | Link fail |
| Service | Green | Normal |
| | Yellow | Soft fail |
| | Red | Hard fail |

3.2.3 PSU (ADXV-HPR-PSU)

Figure 3-18 ADXV-HPR-PSU Front View

- Spec
 - Size: 2.36 x 17.8 x 10.3inches
 - Weight: 11.02lbs for AC/DC PSU

3.2.3.1 Port

ADXV-HPR1-ADXV-HPR4 ports connect respectively to ADXV-HPR's front port.
 ADXV-HPR-ORU port connects to ADXV-HPR.
 ALARM port connects to 'PSU ALARM' port of ADXV-HPR-ORU ALARM port
 AC IN 110V port connects to AC 110V

3.2.3.2 LED

| LED | LED color | Status |
|---------|-----------|-----------|
| ALARM | Green | Normal |
| | Yellow | Link fail |
| SERVICE | Green | Normal |
| | Yellow | Soft fail |
| | Red | Hard fail |

3.2.3.3 AC Switch

The ADXV-HPR is operated at 110 AC.

(WARNING: The AC switch must be set to OFF before cable connection to avoid equipment damage and personal injury.)

(WARNING: To avoid damage, be sure 110V AC for operation of ADXV-HPR.)

(CAUTION: DOUBLE POLE/NEUTRAL FUSING.)

The procedure for connecting ADXV-HPR

- AC S/W OFF
- AC cable connection
- Optic connection
- RF cable connection
- AC S/W ON

4. CABLE CONNECTION

5.2.1 Rack Mount

Figure 5-2 ADXV-HPR Rack Mount Front and Rear View

6. INSTALLATION

6.1 Pre-Installation Inspection

Please follow these procedures before installing ADXV equipment:

- Verify the number of packages received against the packing list.
- Check all packages for external damage; report any external damage to the shipping carrier. If there is damage, a shipping agent should be present before you unpack and inspect the contents because damage caused during transit is the responsibility of the shipping agent.
- Open and check each package against the packing list. If any items are missing, contact ADRF customer service.
- If damage is discovered at the time of installation, contact the shipping agent.
- Verify the AC voltage with DVM (Volt meter) is 110V AC. Incorrect AC voltage can damage the ADXV equipment.
- This power of this system shall be supplied through wiring installed in a normal building. If powered directly from the mains distribution system, it shall be used additional protection, such as overvoltage protection device.
- Over voltage category(OVC) & Pollution degree(PD)

| | |
|-----------------------------|--------|
| Over voltage category (OVC) | OVC II |
| Pollution degree (PD) | PD2 |

6.2 ADXV Installation Procedure

6.2.1 HE Installation Procedure

CAUTION: ADXV- HE should be installed inside building only.

6.2.1.1 Installing a ADXV- HE in a rack

The ADXV HE chassis mounts in a standard 19" (483mm) equipment rack. Allow clearance of 3" (76mm) at the front and rear, and 2" (51mm) on both sides for air circulation. No top or bottom clearance is required.

- Consideration:
 - Eight mounting holes (two holes at each corner of ADXV-HE rack) are to attach it to the 19" rack. The ADXV HE must be securely attached to a rack that can support the weight of the ADX.
- Mount procedure
 - The following steps should be followed while mounting the ADXV HE
 - Verify that the HE and Mounting holes are in good condition
 - Set the ADXV HE against the 19" rack and secure the unit with screws
 - Verify that ADXV HE is securely attached
 - Connect the GND cable
 - Connect the RF cable
 - Connect the Power
 - Connect the Optic cable

Figure 6-1 HE Installation Procedure

6.2.2 ADXV-HPR Installation Procedure

The ADXV-HPR chassis mounts in a standard 19" (483mm) equipment rack. Allow clearance of 3" (76mm) at the front and rear, and 2" (51mm) on both sides for air circulation. No top or bottom clearance is required.

- Consideration:
 - Eight mounting holes (two holes at each corner of ADXV-HPR rack) are to attach it to the 19" rack. The ADXV-HPR must be securely attached to a rack that can support the weight of the ADXV.
- Procedure
 - The following steps should be followed while mounting the ADXV-HPR
 - Verify that the ADXV-HPR and Mounting holes are in good condition
 - Set the ADXV-HPR against the 19" rack and secure the unit with screws
 - Verify that ADXV-HPR is securely attached
 - Connect the GND cable
 - Connect the RF coaxial cable
 - Connect the Power
 - Connect the Optic cable

6.2.3 RF coaxial cable and antenna connection

- > The coaxial cables which are connected to antenna port of ADXV-HPR. Before connection, check the VSWR value of coaxial cable whether it is within specification using Site master.
- > At this time, check if the Return loss have above 15dB or VSWR have below 1.5
- > The part of antenna connection fasten to port not to be loosed and not to be injected the dusty and insects
- > The antenna connected to ADXV-HPR is only serviced in in-building

6.3 Grounding

A ground cable is included in the box. The grounding terminals are located at the rear of the ADXV HE and ADXV-HPR. The grounding cable should be properly connected before powering on the equipment.

Figure 6-3 HE Ground Cable Connection, Protective Earthing Conductor (HE chassis rear side)

Figure 6-4 ADXV-HPR Ground Cable Connection, Protective Earthing Conductor (ADXV-HPR chassis rear side)

Round terminals located on the side of a 1.25mm²(16AWG) or more wires Using permanently connected to earth(Protective earthing conductor).

6.4 Optic Port Cleaning

- We recommend cleaning optic connector using a dry optical cleaning swab or tissue in a dry environment as needed. We recommend cleaning the optic connectors only if the expected optic loss is higher than the loss reported in the Web-GUI by 1.5dB. (Figure 6-5)
- When optic connector are not in use, the port should be covered with a protective dust cap. (Figure 6-6)

Figure 6-5 Optic Connector Cleaning (left) and Optic Port Cleaning (right)

Figure 6-6 SC/APC Optic Connector Dust Cap

7. WEB-GUI

7.1 Web-GUI Setup

The Web-GUI allows the user to communicate with the DAS system either locally or remotely. To connect to the DAS system locally, you will need a laptop with an Ethernet port and a RJ-45 crossover cable. To connect to the DAS system remotely, you will need to have an active internet connection and the ADXV system must have an external modem box connected to the ADXV.

7.1.1 DAS system/PC Connection Using Web-GUI

- Verify that your Local Area Connection is set to Obtain an IP address automatically under the Internet Protocol (TCP/IP) properties
 - If you are connecting to the unit remotely (use of a modem), then skip this and next step.
- Connect the RJ-45 crossover cable between the laptop's Ethernet port and the repeater's Ethernet port
- Launch an Internet Browser
- Type the following IP address into the address bar of Microsoft Internet Explorer: <http://192.168.63.1>
 - If you are connecting to the unit remotely, then type the IP address of the modem to connect to the unit
- The following login screen will appear:

Figure 7-1 Login screen

If you are not the Administrator, please type in your assigned username & password which you should have received from the Administrator.

Table 7-1 Account Information for Login

| Account type | Show items | Control Items | Default ID | Default Password |
|---------------|------------------|------------------|------------|------------------|
| Administrator | all Items | all items | admin | admin |
| User | restricted items | restricted items | adrf | adrf |
| Guest | restricted items | read-only | guest | guest |

7.2 Administrator/User Mode

7.2.1 Common

7.2.1.1 Navigation Tree

The navigation tree located on the left hand side of the Web-GUI allows the user to switch between the various modules that are connected to the system.

Table 7-2 Navigation tree

| Parameters | Description |
|---|---|
|  | Expands the entire navigation tree |
|  | Collapses the entire navigation tree |
|  | The module has the expandable subordinate modules |
|  | The branch is currently expanded |
|  | The module has soft fail alarm |
|  | The module has hard fail alarm |
|  | The module has no alarms (normal) |
|  | The selected module will have orange colored text |

7.2.1.2 Power Status

Display the power source that is currently being used.

Table 7-3 Power Supply Status

| Input Power Status | Display Image |
|--------------------|---|
| AC |  |
| Battery |  |

7.2.1.3 Commissioning Status

Display whether or not the module has successfully been commissioned.

Table 7-4 Commissioning ICON

| Status | Display Image |
|------------------|---|
| Commissioned |  |
| Not-Commissioned |  |

7.2.1.4 Information

ADRF Remote Operation & Management System

| Information | |
|---------------|--------------|
| Serial Number | SN_NMS |
| Latitude | N777.777777 |

Figure 7-2 ADXV General Information

- **Information:** Displays the serial number, latitude/longitude, firmware version of selected module, and Web GUI version of the NMS.
- **Location:** Displays the address where the ADXV is installed.
- **Description:** Displays the description of selected module. The description of each module can be edited from the Install tab. It is recommended to use the location of the module as the description. This description information can be seen when hovering over the device tree in order to easily identify each component.
- **Technical Support:** Displays ADRF's Technical Support contact information.
- **Installer Contact Info:** Displays the contact information of the installer.

7.2.2 Status Tab

7.2.2.1 Status – NMS

The NMS Status page provides an overall view of how the system is performing. From the NMS Status page, the user can see what modules are connected to ADXV-HPR. In addition, the user can see if any alarms are present in the system and also the commissioning status of each module.

7.2.2.1.1 System Summary

The Summary section provides the user with the number of components physically connected, the number of soft/hard/link fails present in the system, and also the number of commissioned and non-commissioned components.

Table 7-5 System Summary Description

| Parameters | Description |
|------------------|--|
| Connected | Display the number of modules physically connected to ADXV-HPR |
| Soft Fail | Display the number of soft fail present on each module |
| Hard Fail | Display the number of hard fail present on each module |
| Link Fail | Display the number of link fail present on each module |
| Not Commissioned | Display the number of non-commissioned or commission failed module |
| Commissioned | Display the number of successfully commissioned module |

7.2.2.1.2 HE Alarm Status

Display the alarm status of each HE component.

7.2.2.1.3 HE Commissioning Status

Display commissioning status of each HE component.

7.2.2.1.4 Alarm

Displays alarm status of the NMS. If an alarm is present in the system, the color of the system alarm tab will change according to the type of failure.

7.2.2.1.5 SNMP

The image shows a web form titled "SNMP" for configuration. It contains two input fields: "Site ID" with the value "adrf" and "Manager IP" with the value "0.0.0.0". Below these fields is a "Set" button.

Figure 7-3 SNMP (Install – NMS)

The SNMP section allows you to specify the Site ID and Manager IP. The Site-ID is the code that is used to identify a particular module. The Manager IP field is where the user inputs the IP address of the NOC system that is being used to monitor the SNMP traps.

7.2.2.1.6 Location

This section allows the user to input the latitude and the longitude of the repeater.

The form is titled "Location". It contains two rows. The first row is for "Latitude" and has a dropdown menu with "N" selected, followed by a "+" sign and a text input field. The second row is for "Longitude" and has a dropdown menu with "E" selected, followed by a "+" sign and a text input field. Below these fields is a "Set" button.

Figure 7-4 Location Setting (Install – NMS)

- Select N or S from the dropdown menu for Latitude
- Select E or W from the dropdown menu for Longitude
- Input the first 3 numbers of the latitude/longitude in the text area after the "+" and before the "."
- Input the last 6 numbers of the latitude/longitude in the text area after the "."

7.2.2.1.7 External Modem Box Settings

This section allows the user to specify an alternative IP, Subnet Mask, and Gateway settings. These settings are enabled when the Host/Remote switch is set to the Remote position.

The form is titled "External Modem Box Settings". It contains three rows. The first row is for "Repeater IP" with a text input field containing "192.168.70.202". The second row is for "Subnet Mask" with a text input field containing "255.255.255.0". The third row is for "Gateway" with a text input field containing "255.255.255.0". Below these fields is a "Set" button.

Figure 7-5 External Modem Box Setting (Install – NMS)

7.2.2.1.8 Description

This section allows the user to save the description of NMS.

The form is titled "Description". It contains one row for "Description" with a text input field containing "desp_rfu_700". Below this field is a "Set" button.

Figure 7-6 Description (Install – NMS)

7.2.2.1.9 SNMP Agent False Alarm Test

This section allows the user to generate both soft and hard fail alarms. After alarms are generated, the NOC can poll the ADXV to see if alarms are present. All alarms generated during this test are false alarms.

Figure 7-7 SNMP Agent False Alarm Test (Install – NMS)

7.2.2.1.10 Location Info / Installer Info

This section allows the user to specify the address of the repeater and also the information of the installer.

7.2.3 System

The System tab allows the user to perform firmware updates, upload closeout packages, view any changes to the system, backup existing configuration, and add/remove user accounts, and change the login credentials of the Administrator.

7.2.3.1 System: Account

7.2.3.1.1 System: Account - Account Management (Admin Only)

The Account Management section allows the Administrator to delete any user/guest account. Please note that the Account Management section is only available if you are logged into the system as the Administrator. To delete a user/guest account click on the Account Management link and under the Delete column, click on the delete button.

7.2.3.2 System: Logs

7.2.3.2.1 System: Logs - Event Log

This section displays system events that have taken place. The Event Log displays who has made the changes, the time and date of when the event took place, and what changes were made to the system. The System Log tracks the following events:

- System Initiation
- Alarm Set
- Alarm Clear

7.2.3.2.2 System: Logs - User Log

This section tracks user activity within the system. The User Log displays who has made the changes, the time and date of when the event took place, and what changes were made to the system. The User Log tracks the following items:

- Log in / Log out activity
- Changes to gain/attenuation/output values
- System event generated by user(firmware update, backup/resote, create/delete account)
- DAS Navigation Tree Lock/Unlock
- Description change
- Repeater/installer information change
- Setting date/time
