#### AVOID HEARING DAMAGE!

Permanent hearing loss may occur if the good call™ Handset is used at a high volume and kept at your ear for prolonged periods of time.

#### BUILT-IN BATTERY CARE:

Your product is powered by a rechargeable battery. The full performance of a new battery is achieved only after two or three complete charge and discharge cycles. The battery can be charged and discharged hundreds of times, but will eventually wear out. Unplug the charger from the electrical plug and the product when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time. Leaving the product in hot or cold places will reduce the capacity and lifetime of the battery. Temperatures between 59°F and 77°F are best.

## **BATTERY WARNING!**

Caution – The battery used in this product may present a risk of fire or chemical burn if mistreated. Do not attempt to open the product or replace the battery. It is built-in and not replaceable. Use of other batteries may present a risk of fire or explosion and the warranty will be terminated. Only recharge your battery with the provided charger designated for this product. Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste or in a fire as they may explode. Batteries may explode if damaged.

## **FCC STATEMENT:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
