05U3674-2 SAR  
Report revised 9...

Hi Mike,

Here are the answers.

Question #1: SAR tests were performed with WLAN module installed. Please indicate the location of WLAN transmitting antenna(s) in the section 12.2 of SAR test report .  
<answer>report is revised to indicate the locations of WLAN antennas in the section 12.2(pages 27 and 28)  
of SAR test report.

Question #2: What was the WLAN mode of operation during SAR tests ?  
<answer>Middle Channel @ 2437 MHz 802.11b (1Mb/s) 802.11b Mode and power level setting = 20(target power in ART)  
during SAR tests.

Thanks,

Claire
