

Modular Approval Checklist  
FCC ID: N7NMC7700

Item	Requirements	EUT
<b>1</b>	The radio elements must have the radio frequency circuitry shielded.	Module RADIO elements are shielded. Please see submitted external photograph exhibits
<b>2</b>	The module must have buffered modulation/data inputs	Module chipset design incorporates integrated buffer circuitry
<b>3</b>	The module must contain power supply regulation on the module;	Module chipset incorporates voltage regulation to transceiver circuitry
<b>4</b>	The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s)	Not applicable to licensed modules
<b>5</b>	The module must demonstrate compliance in a stand-alone configuration;	EUT conformance testing was performed in a standalone configuration
<b>6</b>	The licensed module must have a FCC ID label on the module itself. That FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily removed. If not, a second label must be placed on the outside of the final device that contains the following text: Contains "FCC ID: N7NMC7700"	Please refer to the FCC ID label format. Labeling instruction has been provided in the user manual exhibit(s).
<b>7</b>	The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements;	The Module is compliant with all applicable FCC rules. Compliance requirements are stated in the user manual exhibit(s).
<b>8</b>	The module must comply with RF exposure requirements.	Compliance with RF exposure requirements is addressed in RF exposure report
