RE: Supersede MPE and Test Report exhibit
FCC ID: N7NMC8795

This request is for supersede of the Test Report and MPE exhibit from the filing for the above FCC ID. The exhibit requires supersede to provide updated GPRS/EGPRS1900 (1 slot) power information. The original report stated that the conducted output power measurements were all made using peak output power method, however the lab have determined that for the GPRS/EGPRS1900 band (1 slot), they made a reporting error and stated the average power measurements instead of peak. There have been no changes made to the equipment, rather the lab has checked the same device and have provided the updated test report with the correct power figures included.

Sincerely,

Vina Kerai
Compliance Engineer
