

Here's the response to your comments.

Comment 1. "Users Manual needs Pt. 15.21 statement. Changes or modifications not expressly approved by the party responsible compliance could void the user's authority to operate the equipment."

[Denis Lalonde] The text that you proposed was added to page 2 of the User Manual. The corrected User Manual (Manual2.pdf) was uploaded to the ATCB web site.

Comment 2. This application needs confidentiality letter your exhibits state confidential Block Diagram, Operational Description, Parts List and Schematics. Please upload confidentiality letter to cover letter exhibit.

[Denis Lalonde] I don't understand this comment. I did upload a confidentiality request letter on October 11. I have now re-uploaded the "Confidentiality letter_ATCBcopy(1).doc" to the ATCB web site.

Comment 3. FCC ID number cannot have a # sign in it. It must look like this: FCC ID: XXXXXXX.

[Denis Lalonde] The label drawing was modified as per your recommendation. The corrected label drawing (Label2.pdf) was uploaded to the ATCB web site.

Regards,

Denis Lalonde
