

Cover Removed

The image shows the internal components of a vintage electronic device, possibly a portable radio or amplifier. The main circuit board is populated with various electronic components, including capacitors, resistors, and integrated circuits. A large transformer is visible on the right side, and a power supply section is located at the bottom. The device is housed in a metal enclosure, and the internal components are mounted on a printed circuit board (PCB).

Uniden Radio Bottom (No components located under shield)
