### Overall Evaluation of Novotel U730 Radio Module

FCC id: NBZNRM-U730

This is a quad band PCMCIA Radio Module .

The assessment and grant covers the device operation on 850 ( Part 22H) and 1900 (Part 24E) frequencies and supports the following modulations: GPRS, EDGE, UMTS, HSDPA. The device operations at 900 and 1800 MHz are not operational in US territories.

I find it compliance to the relevant FCC requirements.

The following have been noted:

1: SAR Testing.

The device has been tested in 3 Laptops so to permit an open approval for use in such devices.

2: HSDPA.

The FCC were advised that this application included 3G technology.

Yours sincerely

Hilton Carr
