

## **INTERTEK TESTING SERVICES**

---

---

### **Purpose of Application**

The purpose of this application is to report changes in the original certified product for reason of costing control. The main modification is adding TAD PCB and answering machine function. Other modifications are adding a resistor R4 on the top of U1 and changing the receiver antenna from  $\phi 0.8$  copper Ni-Plt to a UL soft wire. These changes don't intend for maximum power and don't change on field strength ratings.
