

INTERTEK TESTING SERVICES

Purpose of Application

The purpose of this application is to report changes in the previous certified product for production reason and marketing purposes. The main modification is additional feature of ringer melody of the base unit. The RF module of base unit is identical in, construction, dimensions, and electrical circuits except the PCB layout due to the changed of Combo IC format from QFP to Dice format. This change doesn't intend for maximum power and doesn't change on field strength ratings. In addition, there is no any change on handset. All design including electronic, electrical, and mechanical design are remained the same except cosmetics.
