

INTERTEK TESTING SERVICES

Purpose of Application

The purpose of this application is to report changes in the previous certified product for product reason. The main modification is adding TAD PCB for answering machine function on the base unit. On the other hand, the software of the handset is also updated to enable the answering machine remote function. Based on this change of the handset, it does not affect any RF characteristic of transmitter. The RF modules of base unit and handset are remained the same, and all other designs including electronic, electrical, mechanical, and cosmetics design are not changed.
