

PURPOSE OF CHANGE LETTER
For Model MD48X

This letter is to provide additional information regarding the Application of Permissive Change for our model MD48X based on the previous certified version of model MD45X.

The RF module of the above-mentioned models are identical in, construction, dimensions, and electrical circuits and they share the same handset.

The main difference is that the new MD48X has Speakerphone and Telephone Answering Device features. Due to these additional features, the Keyboard PCB, Base Main and cosmetics were changed and added LCD PCB on the base unit.

The above changes are not intended for maximum power and change on field strength ratings.

All design including electronic, electrical, mechanical and cosmetics design remain the same except the above mentioned changes.
