Federal Communication Commission
Equipment Authorization Division, Application Processing Branch
7435 Oakland Mills Road
Columbia, MD 21048

To Whom It May Concern:

Overview of application FCC ID: NCMOGE0307, Model: GE0307

This application based on FCC ID: NCMOGE0301 Model GE0301

Follow modification have been done:

Components for FDDII operation have been replaced by components for FDD IV operations (SAW filter, Power amplifier and directional coupler)

The Printed circuits board of the GSM section, FDD I / FDD V sections, and antennas are same as in approved model GE0301.

The uploaded exhibits to this application need to be replenished with following exhibits from GE0301 application:

- SAR Test report of GE0301 to cover FDD V operations
- EMC Test report of GE0301 to cover FDD V (FCC part 22) operations

Without these test report, the FCC application of GE0307 is invalid.

Declarations:

We attest that above changing are not relevant for GSM, FDD I / FDD V behaviour subject to regulatory items.

Further we attest that HSUPA Release 6 or WCDMA Release 99 operations have same affect to RF behaviour since same modulation characteristics and same RF paths are used for R6 and R99.

Therefore FDD IV EMC report for WCDMA operation is applicable for HSUPA operation too.
