Thema Response to Inquiry to FCC (Tracking Number 701219)

Inquiry:

Dear FCC, According to the current policy for TCBs on the handling of 3G mobile phone technologies, the TCB has to involve the FCC prior to certifying any 3G device. We are currently in the process of certifying following device: Modular Transmitter - GSM 850 / PCS 1900 / WCDMA 850 + 1900 MHz Recent FCC trainings, telephone conference calls and the Preliminary Guidance for Reviewing Applications for Certifications of 3G Devices (May 9,2005) have been taken into consideration. Please confirm or advice.

Response:

FCC recommends using the SAR test procedures for 3G devices as described in the attached documents. These procedures must be used for applications submitted to TCBs for approval. Questions about using alternative procedures should be submitted at www.fcc.gov/labhelp.

Do not reply to this message. Please select the [Reply to an Inquiry Response](#) link from the OET Inquiry System to add any additional information pertaining to this inquiry.
