

American Certification Body Inc.
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

ACB:

I can see that the antenna has an FCC ID but that certification has not yet been completed. Are these items intended to operate together as a system and be sold together? Why does the antenna have an FCC ID?

Applicant:

It is a mistake. The antenna does not have an FCC ID.

ACB:

Please confirm if this device also has an internal antenna? The operation description refers to the Gate Antenna as "additional". Does this mean there is another option?

Applicant:

We confirm, this device has only the gate antenna now.

ACB:

Please describe the antenna connector. I suspect it is a multi-pin connector with pins for power to the antenna and RF connection also. Please confirm the type of connection.

Applicant:

The connector is a two-pin-connector: 1 pin for ground, 1 pin for RF connection.
