

Attestation Of Professional Installation

American Telecommunications Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

To Whom It May Concern:

Nokia Wireless Routers hereby attests that the product for which certification is sought under FCC ID NPD-R242-V01, must always be professionally installed as stated in both the user manual and installation manual.

The Nokia radio R242 is installed with the antenna mounted on a rooftop. It is sold as part of a networked system to which the end-user subscribes. The configuration installed (antenna and amplifier combination) is dependent on the subscriber's location and requires co-ordination by the network provider. Additionally, a water-proof building entry to lead the RF cable from the outside antenna to the indoor radio needs to be created. These factors require that the system be professionally installed.

Sincerely,

Nico van Waes, Ph.D.
Systems Engineer
Nokia Wireless Routers
