## **AFFIDAVIT FOR ESN PROTECTION OF CELLULAR MOBILE TELEPHONES**

We hereby certify that the Handheld Portable Cellular Telephone (FCC ID: NPWWCH-500) is so designed that it complies with all the requirements for ESN protection specified in Section 22.919 of the FCC Rules.

- a) The transmitter in service has a unique ESN.
- b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely,

**Re: WIDE TELECOM INC.  
FCC ID: NPWWCH-500  
FCC Part 22 Certification**

Gentlemen,

We hereby confirm that there is no belt-clip available at this time for our handset model WCH-500. We also confirm that the only battery option is the standard battery used during testing for this filing. If additional accessories become available in the future which require FCC testing and approval then we will proceed accordingly.

If you have any questions regarding this matter, please do not hesitate to contact me.

Sincerely,

**Matt Park  
Sales Manager
