FCC RF EXPOSURE INFORMATION

Read this information before using your phone

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations with a 0.4 inch (1.0cm) separation distance between the back of the phone and the user's body. To comply with FCC RF exposure requirements a minimum separation distance of 0.4 inches (1.0 cm) must be maintained between the user's/bystander's body and the phone, including the antenna, whether extended or retracted. The use of third-party belt-clips/body-holsters with no metallic components that provide a minimum separation distance of 0.4 inches (1.0 cm) can be used to satisfy FCC RF exposure requirements. The use of other body-worn configurations may not comply with FCC RF exposure requirements and should be avoided.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

SMART R&D

The Basics

Turning the Phone On

Press red POWER button to turn the phone on.

The red light flashes, an alert sounds:

When the phone is located in service area, Hisense animation play after display

the date and time. You can now place and receive calls.

Turning the Phone Off

When you wish to turn the phone off, hold down the POWER key for more than 1 second.

Making a Call

1. When the idle screen is displayed, enter the phone number with area code.

- When   you dial a wrong number ,press [C] button once to erase the last
  entered digit or hold down [C] for at least one second to erase all digits
- Hyphen ('-') is automatically displayed.

2. Press SEND button .

- 'Calling...'is displayed on LCD.
- During a call, if you want to adjust the earpiece volume, press the volume keys
  on the left side of the phone.

Ending a Call

When you have finished your call, briefly press the END button or close the flip.

Answering a Call

1. When somebody calls you, the phone rings and 'incoming call' is displayed in the middle of LCD.

2. To answer a call, press [SEND] button to answer the call.
   You can press any key to answer a call except for [END] key.

3. Press [END] to end a call.

※ When using hands free kits and Earphone ,You can use the function of 'Auto Answer'.

This features allows you to answer after the specified time when a call is incoming.

(Refer to 'Auto Answer')

Making a call from phone book

You can store the phone numbers called frequently in memory, called the Phone Book.

You can simply recall the stored memory location to dial.

◆ One touch Dialing by Memory Location

Memory Location 01 through 09 which are your most frequent numbers can be called by one touch dialing.

You can dial the phone numbers stored in phone book Memory from 01 through 09 simply by pressing one button.

◆ Press and hold the second digit of memory location containing the number to be dialed.

Example] memory Location : 07

Press [7] and hold

The number (and Name) stored is displayed, then will start.

.

◆ Two Touch Dialing by Memory Location (Speed Dialing)

This feature allows you to dial numbers in phone book memory through two keys

For memory location 10 to 99.

Example]   Memory Location : 32

Press [3] briefly and hold down [2].

The number (and Name) stored is displayed, then dialing will start.

Ring Type

This option allows you to indicate how you are to be informed of any incoming calls.

The following Options are available:

Bell / Melody : The Phone rings using the tone selected via the menu option

Lamp   : Backlight is turned on and the lamp blinks

Vibrator   : The phone vibrates but does not ring.

Press MENU key to enter Main Menu.

2. Press UP or DOWN key until 'SOUNDS' appears.

● You can also press [6].

3. Press STORE key to select 'SOUNDS'.

4. Press UP or DOWN key to select mode you want. Press STORE key.

● After setting, the corresponding icon will be displayed on the

idle screen

Selecting a Ring Tone

There are 5 kinds of the Bell sound. You can select one among 5 different tones.

Whenever you select a tone, it is played for a few seconds.
