## Instruction Manual for Optical Mouse

## 1) Model : OM-7800S

## 2) Introduction

The Optical Mouse OM-7800S is a mouse designed for use with the IBM computers and IBM PC/AT compatible PCs.

OM-7800S consists of a mouse and a dedicated pad. The mouse contains a part that emits and receives infrared light, whereas the pad has a group of lines that reflects the light.

Place the pad with the longer sides in horizontal direction.

Connect the mouse to the computer only after making certain that power to the computer is off. After that, turn on the power.

## NOTES :

- a) To use OM-7800S, your computer must have IBM PS/2 or Microsoft mouse driver software.
- b) The mouse contains a precision optical unit for detection of lines. Therefore, never expose the mouse to strong shocks.
- c) The pad is made of plastic. Do not scratch the surface with any sharp object.

## NOTES :

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, use and can radiate radio frequency energy and, if not installed and used in accordance with instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does not cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Notice :

Changes or modifications not expressly approved by the manufacturer for compliance could void the user's authority to operate the equipment.
