

NIIGATA SEIMITSU CO., LTD.

---

Gentlemen:

April 26 2001

This letter is to provide the FCC with the claim that the Niigata Seimitsu NSA1800 will not be used as an independent module. The product is self-contained inside an RF shield, is power regulated and uses a simple communications command set for operation. The NSA1800 product is designed to work as an RF FM data and voice channel modem.

Best regards,

*Ryohai Fujimoto,*
