Re: Additional information re class 2 permissive change for Watkins Johnson

Equipment: U-NII Transceiver

Operating Frequency: 5730 - 5820 MHz

FCC ID: NTTSX1115

Dear Mike,

Please find the attachments required for a class 2 permissive change on the referenced U-NII point to point radio.

The antenna is manufactured by RadioWaves Corporation:

Description	Model no.	Gain, dBi
8ft dish		40.0

Data indicates no radiated emissions other than ambient noise were detected up to 40 GHz.

Radiated emissions were performed for 12 MHz channel bandwidth output, determined from previous analysis to be worst case. Conducted emissions were measured for two different operating bandwidths: 6.0 MHz and 12.0 MHz.

If you have questions or need further information, please don't hesitate to call.

Sincerely,

T.N. Cokenias  
EMC Consultant/Agent for Watkins-Johnson
