Re: EA95108

Greg

The center frequency of the **lowest channel** is 5730 MHz, and the bandedge is at 5727 MHz, below the 15.407 limit level.

The center frequency channel of the **highest channel** is 5820 MHz, and the bandedge is at 5823 MHz, below the 15.407 limit level.

I am not sure which numbers you put on the grant. I'll look carefully at the grant to find out.

Best regards

Tom Cokenias
