RE: Declaration of Compliance to RF Exposure Limits for Humans

The John Deere RFID Reader complies with the RF exposure limits for humans as called out in Section 2.1093. The John Deere RFID Reader is used mounted on a mobile cotton picking platform. It is exempt from RF Evaluation based on its operating frequency of 902-928MHz, and output power of 905 milliwatts measured in test report. This would be less than the 1.5 watts requirement for a mobile device operating at 902-928MHz.
