

This device FCC ID: **NUL450126HCT**

Prepared By: Kyle Fujimoto

Date: September 26, 2024

The maximum power that the transmitter is capable of is **1.00** mW Applied duty cycle? **no**

Using the following formula from section 4.3.1 of KDB 447498 at test separation distances ≤ 50 mm

$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] * [\sqrt{f(\text{GHz})}]$

When the minimum test separation distance is < 5 mm, a distance of 5 mm according to 5) in section 4.1 is applied to determine SAR test exclusion.

Max Peak Power (dBm)	Min Separation distance (mm)*	Frequency (Ghz)
-4.05	5	0.916

Value
0.2

"Value" shall be **≤ 3.0 for 1-g** SAR and **≤ 7.5 for 10-g** extremity SAR

Note: The limit is the 7.5 one because the unit will only be touched by the extremities of the human body (hands).

< 50 mm power limits for above frequency and distance

1-g power limit
157

10-g power limit
392

Note: The power in mW is rounded up to the nearest mW, which in this case would be 1 mW
