

PS1296

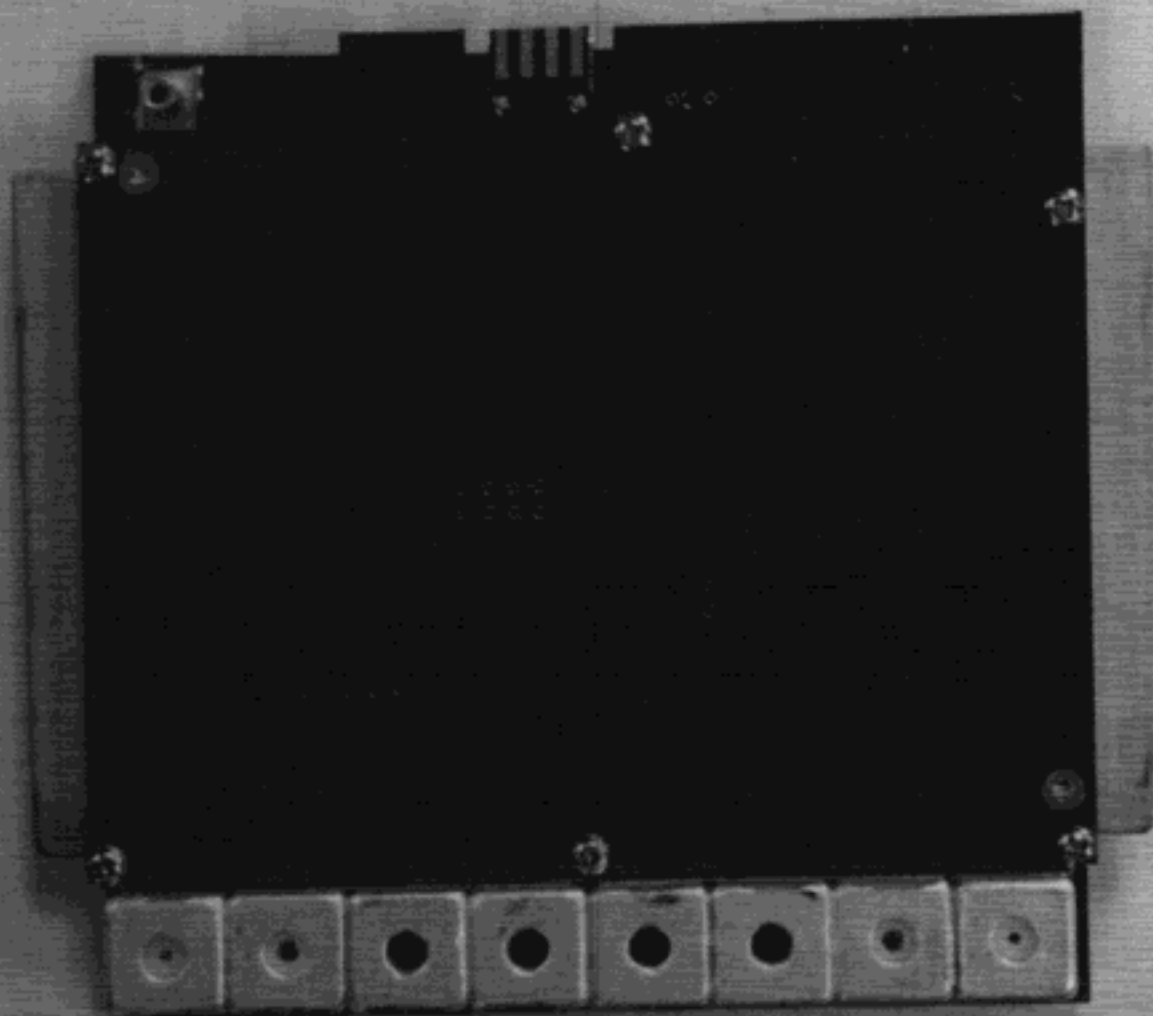

The image shows a rectangular metal plate with several electronic components mounted on it. At the top left, there is a large, rectangular, metallic component, possibly a relay or a switch, with two thick black cables connected to it. Below this component, on the left side, is a small, dark, rectangular component with three pins. In the center, there is a small, square component with a circular feature. To the right of the center, there is a small, rectangular component with a circular feature. At the bottom right, there is a small, rectangular label with the text "PS1296". The plate is secured with four screws, one in each corner.
