SU: Response to your e-mail dated 4/28/99, ID: 7481

Dear Mr. Joe Dichoso,

The following information is our response to your e-mail dated 4/28/99, ID: 7481:

- 1) The block diagram is only considered as confidential and is consist of one page. I will send it again.
- 2) Please note that the output power rating for Retrofit E-meters is **maximum 22 dBm**. If you refer to our original report, We specified the output power as **20 dBm ± 2**. The conductive RF power that we measured in production is from 18.5 to 21 dBm. Therefore, the EIRP is 22 dBm (max.) + 6 dB_i = 28 dBm EIRP and is well below 1 Watt EIRP requirement.
- 3) Attached, please find copies of theory of operations and the installation instruction for the field service personnel.

Sincerely,

Amir Ashtiani
