ATTESTATION

June 19, 2008

To: FEDERAL COMMUNICATIONS COMMISSION
Office of Engineering & Technology
Laboratory Division
Equipment Authorization Branch
7435 Oakland Mills Road
Columbia, MD 21046

Subject: EXCLUSION OF CELLULAR BAND RECEPTION

Applicant: AOR USA, INC.
20655 S. Western Ave. Suite 112
Torrance, CA 90501
Takashi Nakayama, Vice President

FCC IDENTIFIER: NVJSR2000A

Dear Sirs or Madams:

Pursuant to the requirements contained in Part 15.121 of the Commission's Rules, this scanning receiver does not have the capability of tuning the frequencies assigned to the Domestic Public Cellular Radio Telecommunications Service. In this circuitry, this device is not readily alterable to restore the cellular band coverage because the inventory of frequencies contained within this band is not available in the microprocessor.

Also, the microprocessor is fixed soldered and not easily removable. Therefore, since the clipping of leads; or the installation of a simple component such as a diode, resistor, or a jumper wire; or the reprogramming of any semiconductor device contained within this unit cannot be accomplished using a special access code or a personal computer; This is to certify that the conditions mandated in part 15.121 have been met.

Please contact the undersigned if you have any questions or need any further information.

Regards,

Takashi Nakayama
Vice President
