Purpose :

The Uninstaller program allows you to remove the program from your computer if you do not need the system.

{bmc uninst.bmp}

Clicking [Start] button to uninstall system. Click [Cancel] button to cancel the Uninstaller.

Description:

The Uninstaller program will:

1. Restore Windows to its original configuration before Handwritten system was installed.
2. Remove the Handwritten system program group and icons.
3. Remove the directory and files .

Learning control code or gesture

Control code such as F1~F12, Ctrl+A~Z, Alt+A~Z, ESC, Insert, Home, Page Up, End, Page Down, <(Left), ^(Up), >(Right), v(Down), etc.

For examples, press Ctrl+C(Edit/Copy function) in the WORD application. Now let use this feature to learn Ctrl+C hotkey.

The following example will show you how to learn the [Ctrl+C] (Edit/Copy) key in the Word application.

1. First, write the custom gesture(control code) in the application and then click the learning function.

2. Enable the [Learn Control Code] option and press Ctrl+C.

3. Press [Insert] button to save data.

4. The gesture you write is equivalent to the Ctrl+C for keyboard in your application.

1. Write the handwriting(or graph) you wish it to be learned.
2. Open the learning function window, the handwriting or graph you just write will be displayed in the window.
3. Move the cursor to the input string field in the learning window and input the word(s) that stand for the handwriting.
4. Press [Learning New] button and the system will save your handwriting or graphic.

Each has his own Learning File and Handwritten Recognizer Configuration.

{bmc login.bmp}

Learning : You may need to use the learning function while you encounter some problems.

1. Hope the computer to learn the gesture of your characteristic handwriting when the word is recognized incorrectly.
2. Intend to create a new word that the computer doesn't have it. Usually you must use tool to create a new word and give a code that doesn't be used. Then save it to the database.
3. Wish to use a user-defined symbol to represent a string.

Operation:

First, write the handwriting you wish it to be learned on the writing area(screen). Press [ Learning button] and the system would display the handwriting you just write in the learning window. Input a word or a group of words in the text edit field that stand for the handwriting. You could input the word(s) by writing or other input methods. After that, press [Apply] and the system will finish learning.

The function [Apply] is the same as [Insert].

[Apply] : Modify the visible data.

[Insert] : Create a new data.

 [Learning Figure](#)

 [Learning Handwriting](#)

 [Learning Control Code](#)

1. If you write a word that system recognizes it incorrectly.
2. Open the learning function window, you'll find the handwriting you just write would be displayed in the window.
3. Input the correct word in the string field by writing or keyboard input method etc.
4. Press [Learning New] button.
5. Press [Learning manager] button and it'll display the learning database shown as below.
You could look up, delete or undo the learning words.

You could add some common software such as the WordPad, Writer, Word, AmiPro and Excel etc. in the Quick program by [Add] option in [Setup ] menu.

{bmc quick.bmp}

Add: Add a new button.

FEDERAL COMMUNICATIONS COMMISSION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions : (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Shielded interface cables must be used in order to comply with emission limits.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
