Re: Adjustment of the Model PS71090E & PS51080E Repeater in the Field

The Model PS71090E & PS51080E Repeater Amplifier offers only adjustment of gain (below its factory-set maximum gain level) to the technician during installation and maintenance activities. This adjustment is dependent on the physical environment in which the amplifier is to be installed and is described in the Installation and User's Manual. This is the only adjustment accessible without opening the amplifier. Frequency response and gain thresholds are factory set and in no circumstance, are they to be adjusted in the field.

Authorized Signature

A handwritten signature in black ink that reads "Joseph Strzelecki".
