Dear Mike,

Sorry for the delay. Please find the explanation below for your questions:

Question #1: The Antenna connector does not agree with the statement made in page 20 of test report. This EUT is equipped with removable antenna. Please provide technical specification of antenna connector used on the device.

ANS.:The RF connector is using reversed SMA type, please find attachment for details.

Question #2: Modifications have been made during the final compliance tests. Please provide a modification report signed by the applicant to state that the modifications made on the device will be incorporated into each unit sold in the US. In the modification report, please indicate how the copper tape solutions will be implemented on the final product unit.

ANS.: A guarantee letter signed by the applicant is submitted, please check the attachment.

Question #3:The three conducted emission plots submitted do not have any indication on the detector function used. Please specified the detector functions used to obtain these three spectrum plots.

ANS.: The submitted plots was derived from the test instrumnet with peak function.

Statement #1: The FCC logo used in the user manual is designed for FCC DoC procedure and this logo does not apply to the device requires to have Certification. Please remove the FCC DoC logo from the user manual.

ANS.: Sure, we know DoC procedure is not applicable for Transmitter, the FCC logo will be removed from the user manual.
