

Designed for the most extreme field conditions, MobileMapper™ CE is a lightweight, rugged and powerful handheld GPS receiver for GIS. The Microsoft(r) Windows(r) CE operating system supports off-the-shelf Windows CE GIS software and many other mobile applications. Valuable features include real-time, sub-meter GPS positioning, Bluetooth(r) wireless technology, SD memory card expandability, touch-screen technology, field replaceable all-day runtime battery, built-in alphanumeric keypad and more. MobileMapper CE is optimized to overcome the challenges of urban canyons and dense foliage with advanced multipath mitigation. Simple, rugged and affordable, MobileMapper CE ensures your success with uncompromised performance and affordability.
