

**Subject : Request to class2 permissive change**

Dear Regularity Authority,

This class2 permissive change request applies to the FCC ID NZI800964, for the purpose of integrating this module into a finished Zmax product. This module is electrically identical to the module originally approved as no modification was made.

The GSM module FCC ID NZI800964 is co-located with an already approved Zmax unit FCC ID NZI800963 including a Bluetooth transmitter , which can operate simultaneously with the GSM.module,

As part of the SAR evaluation for this product, the GSM module was tested while operating simultaneously with the Bluetooth module.

Given that the distance between both transmitters is 8 centimeters, I declare the FCC ID NZI800964 communication module to be compliant with EMC rules, particularly concerning the intermodulation product spurious emissions caused by the simultaneous transmission, with the Bluetooth module.

The following files are electronically submitted as attachments:

- Cover letter
- External photos of the communication module FCC ID NZI800964
- Internal photos of the communication module showing the implementation of the GSM module.
- External photos (showing label and its location) of Zmax FCC ID NZI800963
- Internal photos of the communication module showing the implementation of the Bluetooth module and its antenna.
- Photos showing the label and its location on Zmax product FCC ID NZI800963
- Datasheet of the GSM antenna used with the communication module.
- SAR test report
- User manual of the overall product

Best regards,

A handwritten signature in black ink, appearing to read "Jean-Charles Bremaud". The signature is fluid and cursive, with a long, sweeping line extending across the page.
