

HXI, LLC Letter of Attestation

7/23/09

In response to TCB request for clarification, this letter attests to the following (2) statements.

- 1.) HXI HDTV-Link Model 6292 is not intended for indoor use. Revision B of the HXI HDTV-Link User Manual Document # 6292 expressly prohibits indoor use with the inclusion of the following restriction warning

RESTRICTION – The HXI Model 6292-2 HDTV-Link System is authorized for outdoor use only. Transmitting from inside a building is prohibited under FCC Part 15.255 (i)

- 2.) Because of the direct up-conversion technique used, both Carrier signals are active under normal system operation regardless of video input applied. In the absence of a supplied video input signal, a CW signal at the carrier frequency will remain present in the transmitted radiation. The presence of both transmitted carrier signals under all operating modes was confirmed during tests at Bureau Veritas and detailed in the submitted report.

Certified By:

A handwritten signature in black ink that appears to read "David B Russell".
